

Typst PDF Sample

In PDF output, you can directly customize text **color**, **Size**, and font.

typ

```
1 In PDF output, you can directly customize text #text(fill: blue)[color],  
#text(size: 20pt)[size], and #text(font: "Liu Jian Mao Cao")[font].
```

Paragraph Alignment

Text is left-aligned by default.

But I want this line centered temporarily!

Without affecting the rest of the document.

This and following paragraphs are left-aligned.

This and following paragraphs are right-aligned.

This and following paragraphs are center-aligned.

This is also centered.

typ

```
1 Text is left-aligned by default.  
2  
3 #align(center)[But I want this line centered temporarily!]  
4  
5 Without affecting the rest of the document.  
6  
7 #set align(left)  
8 This and following paragraphs are left-aligned.  
9  
10 #set align(right)  
11 This and following paragraphs are right-aligned.  
12  
13 #set align(center)  
14 This and following paragraphs are center-aligned.  
15  
16 This is also centered.
```

Columns

This is the first part of a two-column layout. Typst balances column heights automatically.

This is the second column. You can place images, formulas, or any other content here.

We use lorem to generate placeholder text:

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do.

typ

```
1 #columns(2, gutter: 1em)[  
2   This is the first part of a two-column layout. Typst balances column  
   heights automatically.  
3  
4   We use `lorem` to generate placeholder text:  
5   #lorem(10)  
6  
7   #colbreak() // force a column break  
8  
9   This is the second column. You can place images, formulas, or any other  
   content here.  
10 ]
```

Tables

The tablem package is convenient for Markdown-style tables:

Name	Location	Height	Score
John	Second St.	180 cm	5
Wally	Third Av.	160 cm	10

typ

```
1 #import "@preview/tablem:0.3.0": *  
2  
3 #align(center)[  
4   #three-line-table[  
5     | *Name* | *Location* | *Height* | *Score* |  
6     | :---: | :-----: | :-----: | :---: |  
7     | John | Second St. | 180 cm | 5 |  
8     | Wally | Third Av. | 160 cm | 10 |  
9   ]  
10 ]
```

Cell merging is also supported:

Soldier	Hero		Soldier
Guard	Horizontal		Guard
	Soldier	Soldier	
Soldier	Gate		Soldier

typ

```
1 #align(center)[  
2   #tablem[  
3     | Soldier | Hero      | <      | Soldier |  
4     | Guard   | Horizontal | <      | Guard   |  
5     | ^       | Soldier   | Soldier | ^       |  
6     | Soldier | Gate      | <      | Soldier |  
7   ]  
8 ]
```
